```
Sally: Thanks for the note. Could you please
explain what the precise
nature of the difficulty is that keeps leading to the
delay in completing the
model runs? With all of the collective talent
assembled on this list-serve
perhaps some us could be of assistance. I look
forward to your reply.
```

Subject: Subgroup Meeting on April 15th

Dear Subgroup:

Unfortunately, we will not be able to complete the model runs in time for the April 15th meeting. Therefore, we will not be holding the meeting on that date. I regret any inconvenience that this may cause. We will get back to you regarding a future meeting.

Again I apologize for any inconvenience.

Shelton/RTP/USEPA/US@EPA, Loan Nguyen/DC/USEPA/US@EPA

cc: Gerardo Rios/R9/USEPA/US@EPA, Manny

Aquitania/R9/USEPA/US@EPA

Subject: National Cement application to use TDF as an alternative fuel

Hello everyone: I am attaching a message from National Cement's attorney. Just so you understand, the company is now claiming that the CO increase is entirely based on a prior modification - which apparently went through the proper permitting -- in which the MINOX system was tuned to achieve the permit's "very low" NOx emissions limit.

The company is also saying that the CO emissions increase referenced in the Nov. 18th letter when the company was burning TDF is because the MINOX unit needed further tuning with the introduction of the new fuel.

Gerardo had a telephone call with National Cement's consultant and can provide the technical explanation.

Talk to you tomorrow at 12:00 EST -- and thanks for hanging in there with us through this.

Ann Lyons USEPA, R9, Office of Regional Counsel ph: 415-972-3883

email: lyons.ann@epa.gov

---- Forwarded by Ann Lyons/R9/USEPA/US on 01/28/2004 04:17 PM ----

BJ.KIRWAN@lw.com To: Ann Lyons/R9/USEPA/US@EPA

01/27/2004 12:58 PM

Subject: National Cement application to use TDF as an alternative fuel

Dear Ann:

Thanks again for taking the time to call me this morning to discuss the use of tire derived fuel (TDF) at National Cement's cement manufacturing plant in Lebec, California. I looked again at Environ's letter to you dated November 18, 2003, and can better understand your comment that you thought that the plant sometimes experienced an increase in CO emissions when TDF was used, which increase was unrelated to the planned increase in CO emissions through the permit process. While the November 18 letter said that Environ continues to believe that the CO emissions over time would not be higher when burning TDF, not enough time had taken place when the letter was sent to confirm that belief.

One of the reasons why we sent the January 14 letter to you was to respond to

additional questions you had raised. Another was to give you the additional data on CO emissions from the kiln. The attachment to the January 14 letter showed there is no statistically significant difference in CO emissions when burning TDF and when not. Therefore, Environ's beliefs were borne out with experience at the plant.

I look forward to talking with you again after you have had a chance to confer with your internal experts.

Cordially,

B.J.

Everyone:

At the meeting this week, I displayed a postage-stamp sized slide of modeled mercury deposition in the US. I have received several requests for copies of that information, so I decided to send it to everyone.

The mercury deposition modeling was reported at the Air Quality III conference in DC in August 2002. The first file is from the proceedings.

It does not have color copies of the maps, however. So also attached is a presentation made at the Tucson EUEC by the primary author which does have several of the maps displayed in color.

(tentative number)

Brenda,

Per the below notes, I am not planning to join this call until the toxics discussion at 1:45. I think it's probably better that the EPA staff not participate in the EGU discussion given the current status of that rulemaking.

RE: Conference Call - Regional and National Strategies Subject Team - Monday November 1 12:30 EST (b) (6)

(tentative number)

It does not mean that you cannot be on the call but everything I've heard so far suggests that while the EGU issue is being discussed EPA staff are to be non-participants in the discussion. I do not intend to put any of you in a predicament that you'd prefer not to be in. anyone chooses to talk about EGUs from the EPA side, it will be

independent of any coercion by me. Does this help?

John,

I'm confused by the below note. It says that EPA staff will not participate in the EGU discussion, yet it also says that Sam will help moderate the air toxics discussion? Does that mean that I should not plan to join the call until 1:45? Thanks.

Meghan

Subject Conference Call - Regional and National Strategies Team - Monday November 1 12:30 EST 919-541-4407 (tentative number)

This is a reminder of the Policy and Planning Subgroup's National and Regional Strategies Team call scheduled for Monday, November 1 at 12:30 p.m. EST. I believe that the call in number for the call is 919-541-4407 but haven't been through all of my e-mails to confirm. If there is a change, I will notify you early Monday morning. The call will be moderated by me, with assistance on the air toxics issue from Sam Napolitano.

At this point on Saturday, I am unsure if the call is $1 \, \frac{1}{2}$ or 2 hours in length. Assuming the latter for the moment, I will be following the agenda below:

```
12:30 - 12:45 introductory comments and re-review of our assignment
12:45 - 12:50 introductory comments on EGUs
12.50 - 1:00 Mel Schulze EGU comments
1:00 - 1:10 STAPPA/ALAPCO EGU comments
1:10 - 1:40 Comments from other participants and general
discussion on EGUs
1:40 - 1:45 Summary of status of EGU issue and any next steps
1:45 - 2:15 Discuss the air toxics issue and next steps
2:15 - 2:30 Summary of where we are, preparations for November
4 meeting in Laurel, Maryland at the Patuxent Research Refuge.
```

As you know, EPA staff will not participate in the discussion of the EGU issue. What we do not finish on this call will be subject to further discussion in Maryland later in the week.

If you have any questions, please call me or send me an e-mail.

Subject: Summary of discussions on today's conference call

The following briefly summarizes our call today of the Regional and National Strategies Work Team:

- 1. Topics deferred to the Indianapolis meeting with minimal discussion: EGUs, mobile sources, industrial boilers, pulp and paper, petroleum refineries, and air toxics.
- 2. Decision to defer to Indianapolis after some discussion cement manufacturing.
- 3. Recommend to sub-group for acceptance: architectural surface coating, non-industrial solvents, open burning, residential fossil fuel combustion, residential wood burning.
- 4. Defer as low priority to EPA for planned review under area source air toxics program: bulk gasoline terminals.
- 5. Industrial surface coating requested EPA to identify specific sub-categories that are legitimate targets for emission reductions such as coating of wood products.
- 6. Open burning Add recommendation to develop guidance on gaining SIP credit for restrictions on open burning.
- 7. Residential fossil fuel combustion add recommendation for evaluation of low sulfur fuel.
- 8. Put in Bin 1 for near-term action develop guidance for SIP credit for open burning restrictions and other eligible categories, implement expectations in residential wood burning recommendations.

Attendance at the Indianapolis meeting is strongly encouraged. While we may only have about two hours for our discussions, we need the benefit of the best cross-section of attendance possible. Please bring your thoughts on such issues as the benefits, feasibility, urgency, and costs of each sector. These factors are the criteria expected to be considered in formulating final recommendations.

Our discussion will occur after lunch on Wednesday. In the late morning and afternoon on Thursday, the recommendations will be evaluated and discussed by the entire sub-group plus some additional guests, I suspect.

Subject PSD Baseline Window - Mohave

Bill - just wanted to follow up with you regarding the Mohave Power Plant situation. As I mentioned when we spoke on December 16, the Mohave facility previously applied for a permit to construct from the Nevada DEP to install controls pursuant to a consent decree. The facility used a 2000-01 baseline for its analysis and the NDEP (and Region IX) concluded that PSD would not be triggered. Mohave has applied for an extension of its permit, recognizing that it will need temporarily to shut down the facility (perhaps for 2+ years) while it continues to resolve coal and water supply issues and while it installs controls. Under the circumstances, we think it is appropriate to continue to use the 2000-01 period. We also want to ensure that there is no risk to the facility that the reactivation policy would apply when it restarts after installing the controls. When you get a chance, I would appreciate the opportunity to speak with you further to make sure we handle this correctly. Of course, we will also want to speak with the appropriate folks at Region IX.

Thanks very much and happy new year.

Bob

Dear Fred,

The role of coal and LNG in the U.S. and global energy mix and the interplay with CO2 capture and storage are important topics. You point out it is important to consider the lifecycle CO2 emissions from LNG. I agree and would add it is important to do the same for all energy resources.

I think we both recognize that technologies to capture CO2 and prevent it from release to the atmosphere can enable more rapid reduction of CO2 emissions and greater use of coal than would be the case if that technology is not used.

The challenge is how to get from where we are to where we need to be.

You describe our choices as limited to accepting more CO2 from increased coal use or embracing a possibly insecure increase in dependence on LNG. Fortunately, we have more choices available. LNG imports are increasing and that trend appears likely to continue but that is not the only resource we need depend on. A mix of efficiency, continued expansion of renewable energy resources, and coal with CO2 capture and storage, when combined with other current electricity supply options, can meet our needs in

a clean, affordable and reliable manner.

You argue that requiring new coal projects to capture CO2 would make those projects infeasible. I disagree. Yes, a coal plant that captures its CO2 is more expensive to operate than one that emits its CO2, just as a plant that controls its SO2, NOX, and mercury is more expensive than one that does not. While the costs of requiring all of America's coal fleet to capture its CO2 overnight would be daunting, that is not what we are discussing. CO2 capture and injection is a reality now--from industrial operations and in one instance from a coal (lignite) gasification plant. CO2 storage underground is also a reality--30 milion tons a year currently in the U.S. fro enhanced oil recovery.

If you believe that requiring CO2 capture at new coal plants would make them uncompetitive then consider making the case for public investments to support such installations. Such investments, combined with a reasonable program to limit CO2 emissions from all competing energy resources can create a market where coal use can continue without contributing to ever greater loading of the atmosphere with CO2.

If we get started now, we can expand the leadtime available to bring down the costs of CO2 capture (perhaps as dramatically as we have brought down the costs of SO2 capture since 1970). We can reduce rather than increase the controversy over new coal plants, providing a path for lessening the power sector's growth in natural gas consumption. We can create U.S. technology solutions for a globe that will be looking for ways to prevent CO2 emissions. And we can demonstrate for the developing world a technology that they too can use as part of their strategy for economic growth and environmental protection.

Building additional new coal plants that are not designed to capture their CO2 is a mistake. Some now oppose limits on CO2 because they claim this would result in premature retirement of capital stock. Building new CO2-venting coal plants would increase dramatically the inventory of incompatible capital investments and would lock us into additional decades of high CO2 emissions. For every five 500 megawatt CO2-venting coal plants we build we will invest around \$2.5 billion and lock-in lifetime emissions of about 1 billion tons of CO2. The IEA projects that over 2800 500MW coal plants will be built by 2030. The lifetime CO2 emissions from these units, if they do not capture their carbon, would be more than half the total amount of CO2 emitted globally from all coal, oil, and natural gas combustion since the beginning of the industrial revolution more than 250 years ago. If this happens we will have dug ourselves a hole so deep we will never get out of it.

This does not have to happen. The pieces of the puzzle are ready to be assembled. The coal industry should join NRDC in helping to make this happen. It will be good for your business and good for the people of the planet.

David

Subject: RE: National Gasification Strategy

David

CO2 sequestration may happen at some point, but not before many questions and uncertainties are resolved. I agree it is the role of the federal government to fund r&d now to start answering those questions.

In the meantime, we have a looming energy shortfall due to well known problems with domestic sources of natural gas and oil. We also have continuing electric demand growth as US population grows, the economy grows and electrification continues to gain market share. Electricity from coal has been and is the backbone of this virtuous development. If you oppose the current use of coal anywhere in the country, or the expanded use of coal, until CO2 can be sequestered, then you are taking a position that, if accepted, would deny our country the electricity needed to allow a continuing improvement in the health and wealth of the American people.

One answer that most advance to meet our electricity and energy needs is more LNG for the US. The environmental community appears to accept this alternative by its silence, presumably on the ground that natural gas is more acceptable than coal due to its lower carbon content. But is this really true.

When the gas is liquefied, a fixed percentage is lost. When it is gasified, a fixed percentage is lost. To develop the LNG facilities at source and at the receiving end, requires large scale use of steel. A massive number of new ships to transport the gas must be constructed and operated. Pipelines at the receiving end must be deployed. In short, a huge build out of LNG worldwide will spur additional industrialization and additional CO2 emissions.

On the economic side, by accepting LNG as the primary source of incremental energy supply, we are essentially putting our economy on the oil cost curve. LNG is and will be priced off oil and many countries will compete for it. It will be imported from many different places, but a large part will come from the Middle East. The LNG model is conceptually no different than the current model for imported oil. By resisting the increased use of domestic coal, NRDC becomes a prime proponent of continuing and even expanding the existing, flawed model.

I suspect we share many of the same concerns over our energy future, if not the same views on how to meet our needs. If we could get beyond the continuing disagreement over the current use of coal and artificial CO2 emission caps and instead focus on a future where coal plants operate with near zero emissions, I believe we could accomplish a lot in convincing the federal government to start investing now in a better energy future for all Americans.

Dear Fred,

NRDC does not oppose gasification of coal; we support it. But if the government is going to subsidize the conversion of existing natural gas units to coal gasification that program should be designed to assure that CO2 emissions will not increase as a result of the program. We can afford to do this and doing so now will help define a pathway for continuing, sustainable use of coal in the United States. Further delay in deploying gasification with CO2 capture and storage will only make the job more difficult and expensive.

David

Subject: RE: National Gasification Strategy

Gasification of coal holds out the promise of advancing the health of the American people by providing always on, affordable electricity while meeting our national security needs. By focusing only on CO2 emissions, and prohibiting more robust coal utilization in the process, we will certainly guarantee scarce and expensive electricity for our country, hurting those who can afford it least the most, a stagnant economy and greater reliance on foreign sources of oil and natural gas (through LNG) from the most dangerous parts of the globe. The country and the environment will both be damaged in the process.

RE: National Gasification Strategy

factors would

natural gas plants to

On Friday Bill Rosenberg sent all of us a copy of his proposal to convert a significant amount of electricity plants and industrial facilities from natural gas to coal gasification. I want to share with you some initial comments from NRDC. Bill is a good friend of mine and NRDC supports initiatives to deploy coal gasification with CO2 capture and storage. But we strongly oppose this proposal as it is structured. If a proposal to convert plants from using natural gas to coal is to gain any support, its proponents must guarantee at a minimum, no adverse environmental impacts. While Bill has included in his proposal, provisions to avoid increases in emissions of conventional air pollutants, he does not require emissions neutrality for CO2. The increase in CO2 emissions from the proposed conversion program would be substantial and in direct conflict with the Bush administration's announced goal of reducing the ghg intensity of the US economy. Bill's proposal calls for the construction of the equivalent of 58 500-MW coal-fueled power plants (slightly more than half of this total in industrial applications). Without CO2 capture and storage, each converted plant would more than double its CO2 emission rate compared to continued operation on natural gas. Actual CO2 emissions would increase

even more at each plant because the plant's capacity

likely increase. Attempts to convert existing

A quick estimate of the emission consequences emissions increases from this program would be metric tons annually. This increase is more than 20% administration's pledged reduction in emissions announced ghg intensity initiative. It would be to adopt a program that would conflict in this major critical need to limit US ghg emissions.

As most of you know, I believe that coal gasification and storage can play an important role in helping to of global warming. I have spent a substantial amount communicate to my colleagues in the environmental gasification should be regarded as a partial solution threat. But an attempt to promote gasification in a convert plants from natural gas to a fuel that emissions rates will inevitably cause gasification to threat and as something that should be fought. In proposal would be counterproductive to public as well as in conflict with the need to limit US CO2

This fatal defect could be remedied by requiring CO2 neutrality as a condition of eligibility: at a meet a CO2 emission performance standard no greater rate for natural gas firing. Bill acknowledges that not analyze this approach. That should be done if proposals are to be viable. There is a national and real experience sooner rather than later with CO2. A subsidy program that includes capture as an could alleviate gas supply-demand stresses and

Argus Air Daily Volume 12, 138, July 20, 2005

Holmstead resigns from EPA

EPA Assistant Administrator Jeffrey Holmstead tendered his resignation today, ending a four-and-a-half-year tenure that saw him lead the implementation of some of the Bush administration's most controversial air pollution regulations.

In a letter to President Bush, Holmstead said he planned to resign effective Aug. 30 in order to spend more time with his family.

Holmstead said he was proud of how EPA was able to promote the use of sound science and market-based programs to replace traditional command-and-control programs in order to improve national air quality. "Based on these principles, we have taken a number of important actions to improve air quality and make EPA's regulatory and non-regulatory programs more effective," Holmstead wrote.

In particular, Holmstead cited the Clean Air Interstate Rule (CAIR) and non-road diesel rule as two of his most significant achievements. The two regulatory programs were among the least controversial of the major air quality initiatives under Holmstead, although CAIR is currently facing some legal challenges. Holmstead said he was also "equally proud" of the changes to the New Source Review program as well as new rules for mercury emissions from power plants and the regional haze rule.

Holmstead is one of the longest-serving Bush appointees, having taken the job to head up the Office of Air and Radiation in April 2001. Holmstead previously worked at the DC law firm Latham & Watkins, which represents many clients in industry. His ties to the firm have proven controversial at times, particularly when it was revealed that several items in the Clean Air Mercury Rule were copied almost verbatim from Latham & Watkins memos (AAD 2/12/04).

Holmstead's departure comes at a time when the president is seeking to fill several other major jobs at EPA. Earlier today, the Senate Environment and Public Works Committee voted to recommend the confirmation of Marcus Peacock as deputy administrator and Granta Nakayama as assistant administrator for enforcement and compliance assurance. Nakayama's nomination raised some concerns among Democrats because he works for the firm Kirkland & Ellis, which represents W.R. Grace & Co. in lawsuits seeking damages for cancer and other serious illnesses linked to its mining operations in Libby, Mont (AAD 7/13/05). The only committee member to vote against Nakayama today was Sen. Max Baucus (D-Mont.). The committee also voted in favor of Susan Bodine's nomination as assistant administrator for the Office of Solid Waste and Emergency Response, which oversees the Superfund program. Sen. Barbara Boxer (D-Calif.) said she would place a hold on the nomination, preventing a Senate vote, until EPA provides additional information on Superfund sites.

Given the controversies surrounding most of EPA's policies under Bush, environmentalists are likely to heavily lobby the Senate should they disagree with whoever is the choice for Holmstead's replacement.

Already, environmentalists are expressing concern that Bill Wehrum, counsel to Holmstead and former lawyer at Latham & Watkins, will be the nominee. Supporters of tough air regulations are already compiling files on Wehrum's work at EPA where he played a key role in drafting controversial regulations such as the mercury rule. Clean Air Watch President Frank O'Donnell called Wehrum a "dark force whispering in Holmstead's ear."

{In Archive} Mercury panel Hirsch, Dennis to: Bill Wehrum, jwalke, bob.sussman This message is being viewed in an archive.

07/26/2005 01:28 PM

Bill, John and Bob:

It was good to talk with the three of you. Although we were not able to all be on the phone together, I did speak with each of you and believe we are set for our panel at the ABA Fall Meeting in Nashville. The plan is as follows:

Our panel will be held on Friday, September 23, at 10:30 a.m. We have tentatively planned to get together as a group at 10:00 a.m. in the room where our panel will be held (consult the final conference schedule to identify the room). This will allow us to touch base one more time before the presentations.

I will lead off with 10 minutes of basic background on the regulations, litigation, etc. Bill will go next, followed by John and then Bob. Each of you will have 15 minutes to speak. This will be followed by 30 minutes of Q&A.

One important goal for the program is to discuss the mercury trading program on a policy level, using it as a means to provide some insight into the use of trading as a regulatory mechanism. A second goal is to discuss the legal issues raised by the mercury trading regulations. Our panel should be well designed to cover both aspects. Bill will begin by focusing on the policy dimension; John will also address policy and will interweave it with law; Bob will focus on the legal questions.

Your written materials are due to me by 8/5 (by e-mail, please), and then to the ABA by 8/8. Bill is going to provide his Powerpoint slides; John is going to provide a condensed version of NRDC's rulemaking comments; and Bob is going to provide the article he wrote for NR&E.

You also need to provide Amelia Hanrahan at the ABA with your speaker forms (Speaker Data Form and Speaker Release Form) and bio by 8/8. I am attaching the ABA guidelines for written submissions and bios. You should have received a hard copy of the speaker forms from the ABA some weeks ago. I will try to get a digital version of these forms and e-mail them to you.

I look forward to seeing you in Nashville and to a great panel.

Best,

Dennis

07/26/2005 02:52 PM

Rasputin?! Congrats

EPA

Holmstead aide set to assume air office's top post

Darren Samuelsohn, Greenwire senior reporter

A former industry attorney who has served as a key architect of Bush administration pollution policies over the last four-and-a-half years will run the U.S. EPA's air office at the end of August.

Bill Wehrum, senior counsel to EPA air chief Jeff Holmstead since 2001, was promoted today to principal deputy assistant administrator as part of several moves within the agency.

EPA spokeswoman Eryn Witcher said Wehrum will be in line to temporarily replace Holmstead as acting assistant administrator of the Office of Air and Radiation when Holmstead leaves the government Aug. 30. In that role, Wehrum will be called on as the lead policy expert and as one of the administration's top political representative for air pollution issues.

Holmstead, the controversial head of EPA's air office, tendered his resignation last week and announced plans to spend the next year traveling around the world with his family. Both Holmstead and Wehrum worked together as industry lawyers in Washington prior to joining the Bush administration at the firm of Latham & Watkins.

In the Bush administration, the two men are considered designers of Bush's "Clear Skies" legislation for power plants that has struggled to gain support on Capitol Hill. Both also developed what are now final regulations to overhaul the New Source Review permitting program and to allow market-based trading of mercury emissions from electric utilities -- rules now the subject of litigation in federal appeals court.

Bush still will need to formally nominate a new EPA air pollution official, though any move to do so in the next month will not be acted upon by Congress given lawmakers will be on a monthlong recess until after Labor Day. Wehrum has been mentioned by some to be a leading but controversial candidate, and environmental groups say his selection could lead to objections in

the Senate.

"He has been Holmstead's Rasputin," said Frank O'Donnell, head of the advocacy group Clean Air Watch. "Now he will become a more public figure."

EPA today also changes the role of Rob Brenner, a senior EPA staffer for more than 20 years. Brenner will leave the role of principal deputy to Holmstead to become head of the EPA Office of Policy Analysis and Review. An agency press release said Brenner will still represent the air office within EPA on science and innovation projects.

In an e-mail to EPA air pollution office employees, Holmstead said today that the internal changes have long been planned. "I have known Bill for years and have always admired his knowledge of the Clean Air Act and the way he works through difficult issues with a variety of people having widely divergent views," Holmstead wrote. "Bill's skills and talents have been instrumental in many of our successes over the last four years, and I am pleased that he has agreed to take on this new responsibility."

John, Jason and Lee:

As the day for our panel draws near, I wanted to confirm our meeting on Friday at 10:00 a.m. in the room where, a half hour later, our panel will be held. I have spoken with both Jason and Lee and they are up to speed on what we are doing. All the same, with two new speakers it makes it important that we have a few moments beforehand to make sure we are all on the same page. So please try to make it to the room by 10:00 a.m.

Also, please send me whatever biographical information you would like me to use for introductions. I would appreciate getting that in the next day or so.

Finally, I just wanted to clarify that each of you will have 15 minutes to speak. We will leave 30 minutes for Q&A.

The room will be set up for PowerPoint should you want to use slides. If you are going to use Powerpoint, please bring your slides on a disk in addition to having them on your laptop. We will be transferring all slides to one laptop prior to the panel and then using that machine only.

Information on the Fall Meeting is available at http://www.abanet.org/environ/fallmeet/2005/, should you need it.

See you in Nashville.

Dennis

Pat,

I was trying to get people to cover it and hold a meeting but we are wrapped up in a number of significant rules and litigations and because of schedules literally we have no one to ocver the meeting. I had thought up until Monday we could still pull it off and I lost the last possible knowledgeable EPA person. If it is really a problem I can try something creative but I am out of people and obvious answers.

Subject Re: update on November meeting logistics -topic change

Late hit Bill,

I have already booked a room for it. The Federal Register has already been submitted, signed and going to print. Are you sure there's nothing to chat on/update on? Are the members aware of this? I know Jeff M was kinda bummed you cancelled the previous time. This would leave the only subcommittee meeting as Rob's for that morning. Perhaps you can ask Jeff to meet and have an informal discussion on the future of the subcommittee and topics to cover after the title v report is complete (next meeting for that right?)

Hello CAAAC members and related folks,

As we get closer to the next CAAAC meeting I thought I would fill you in on where we are with the November 17 CAAAC meeting. A final agenda will be available by end of the week. I was able to get an extension until Oct 21 for the hotel for those who have not yet requested a room. The number at the Camino Real is 1800 769-4300 ask for the EPA block of rooms. The schedule as of now is that there will be concurrent subcommittee meetings on November 16 in the morning starting at 9;00 - noon then after a lunch speaker tours of the area will occur. If you have not weighed in on your tour preference please see the options below and let me know which you prefer. Then Dr. Barron has invited members to a dinner at her residence for the evening

On November 17 after a welcome and update on issues from Bill Werhum and perhaps a guest key note speaker the full committee morning session will consist of two panels on border issues a Binational AQM in the Border Region Panel, and a Border Transportation Panel which will include an update on mobile source technical review subcommittee diesel workgroup draft recommendations. After lunch (on your own), the committee is scheduled to discuss EPA's Clear Sky Analysis. Finally after some closing remarks the meeting will adjourn at approximately 4:15.

I would also like to check calendars for the Spring meeting - please let me know via email if you are available the week of April 3 -7 2006, preferably wed/Thursday or if the last week of march 27 -31 would be preferable.

I will send out at least one further email with more information to follow including agendas and read ahead materials. If you have any questions please email me or call me at 202 564-1082. Thank you.

Subject November meeting logistics

Hola CAAAC members and interested parties,

Details are being finalized for the November CAAAC meeting. It will be in El Paso, TX. on November 16 and 17. The agenda is being drafted right now with two key topics for the full Committee meeting. The first being Border issues with an emphasis on Diesel retrofitting in the morning. This will possibly include review and voting on the "RECOMENDATIONS OF THE CLEAN DIESEL WORK GROUP" coming from the Mobile Source Technical Subcommittee. I will email you the draft recommendations prior to the meeting to allow you to familiarize yourself with them. The afternoon session will be a discussion of PM implementation issues. Hotel Reservations are now available at the Camino Real (1 800 769 4300) please make your reservations before Oct 14 ask for the EPA block of rooms. On November 15 there will be two related meetings of EPA, National and local constituencies to discuss in greater detail border and diesel issues. It is likely some of you may be invited/attending these meetings as well. I will keep all members informed on these meetings as their agendas are developed, since they will be extremely relevant to what we will be discussing both at the subcommittee and full committee level.

As is the CAAAC tradition, we will be taking the opportunity of being out of Washington for our next meeting to go on a field trip to see some of the environmental sights of the area. In this case, we have a couple of options for routes. We will be using vans instead of buses for this trip so it will be possible to

have the group split up. Please indicate your choice and let me know by October 14, if you are attending the meeting and which tour you would be interested in attending.

All tours will begin at the Camino Real on Wednesday, November 16 after lunch and end with dinner hosted by El Paso's own, Dr. Elaine Barron. We hope to be joined by members of the Paso del Norte Air Quality Task Force from the U.S. and Mexico as well as some of our other Mexican counterparts.

All itineraries are subject to some changes due to availability of sites, traffic, etc.

The first stop on all tours will be the Wyler Aerial Tramway up Ranger Peak in Franklin Mountains State Park (http://www.tpwd.state.tx.us/spdest/findadest/parks/wyler_aerial_tram/) for a bird's eye view of the binational airshed.

TOUR A: JUAREZ

This group will cross the border to visit the brick kiln project that will be discussed by the Subcommittee on Economic Incentives and Regulatory Innovation . We are working on coordinating a visit to the cement kiln operating in Mexico using waste tires as fuels or a *maquiladora* participating in a binational energy efficiency program. The trip back to the U.S. side will stop at a major trucking company in Juarez where we will see the types of trucks crossing the border and learn about the Portable Emission Monitoring (PEMs) used to monitor diesel emissions in El Paso and Nogales. We will also-view the growth of the *colonias* in the area, showing the combined air and water health concerns of the area. On a Wednesday afternoon we should not have first hand experience of the wait to cross the border as a passenger vehicle but will see some of the solutions being implemented for the cargo traffic.

TOUR B: TRUCKS

After descending Ranger Peak, we will head east for a view of truck traffic crossing the Zaragoza International Bridge and on to one of the nearby truck stops for a demonstration of the IdleAire truck stop electrification technology, including a Q&A with company representatives. This company has "electrified" three truck stops in El Paso, all funded by DOT CMAQ awards, and has achieved a high rate of usage from visiting truck drivers. We will then take the highway back over Ft. Bliss and the Franklin Mountains State Park to the west side of town where we can see into Mexico for a view of the growth of the *colonias* in the area, showing the combined air and water health concerns of the area.

Dear Members and EPA Staff: I wish to warmly welcome you all to our El Paso Meeting. Here are the golf facts.

CORONADO COUNTRY CLUB

located on the west side of the Franklin Mountains at an elevation of almost 4000 feet. Coronado Country Club is a scenic course that offers panoramic views of Mexico, New Mexico, and Texas to the southeast. This course resembles the desert tracks of Arizona and features plush fairways and greens that are considered some of the fastest in the nation. In fact, pros have prepared for the Masters here, and Nike Tour events have been hosted despite the rather short layout. The par 70 layout features only two par 5s. but challenges with four par 4s over 400 yards, and a 212 yards there are no water hazards, at least 14 out-of bounds areas await wayward shots.

Details: Make you reservation for tee times by email or phone

915-584-3841, 1044 Broadmoor Dr. El Paso, TX 79912, email:

Hi Elaine,

Thanks for making it possible for those making the trip to play golf either before or after our two days of meetings. I regret that my travel schedule will not allow me to take you up on your invitation.

I'm looking forward to seeing first-hand the problems--and the progress--along the border that you have described to us over the past few years. See you next month,

Rob

Happy new year to all,

Hope all are doing well in the new year, its only 6 days in and all my resolutions already broken, thats better than last year though!!!. I thought I would give a heads up on next meeting dates and provide some reading material for all to enjoy. For those unfortunates who did not attend the El Paso CAAAC meeting I am sad to report the notes do not properly reflect what a wonderful series of meetings it was and how well Texas treated the CAAAC. Many thanks to all who helped organize the meetings, tours and receptions. For those who traveled on Government travel but have not sent your receipts and reimbursement request to Kamal Thadani at EPA please do so immediately, if you are new to the committee and have any questions on this feel free to contact Kamal (202) 564-1244 or myself (202) 564-1082 for clarification. A quick reminder for these folks is prior to making your flight reservations you need to get a travel authorization from EPA and work with our approved travel agent.

Our April meeting should be an exceptional one as well. The dates are locked now April 4 (AQM subcommittee), April 5 (NSR Subcommittee and Economic Incentives Subcommittee, followed by the Clean Air Excellence Awards and the full committee meeting on April 6. Likely topics for the full committee meeting will include report out and possible recommendation voting on both the Diesel retrofit report from the Mobile Source Subcommittee and the Title V report from the NSR subcommittee. Both of these reports will be supplied as read ahead materials prior to the meeting. All the meetings will be at the Sheraton in Crystal City Virginia. We are currently considering having the awards ceremony at a separate facility in DC. Any local CAAAC members willing to give consideration to hosting a reception in the DC area on the night of the 4th or following the awards on the 5th please let me know and I will be glad to work with you on arrangements.

Please let me know what days of the meeting and awards ceremony you plan to attend. If you have any questions/comments feel free to buzz or zap me. I will be forwarding you more information as the plans are solidified. Thank you and see you all soon.

Sheraton Crystal City Hotel 1800 Jefferson Davis Highway Arlington, Virginia 22202 www.sheraton.com/crystalcity

703-486-1111 or toll free 800 325 3535.

Below are the draft notes for the meetings, for those attending please review those meetings you actively participated in to ensure the notes properly reflects your comments, for those who did not attend here is a chance to see what went on in El Paso. The presentations to the El Paso meeting are at the link below as well for your reading enjoyment.

Hello CAAAC members, followers and fans,

Hope spring is treating everyone well. I am trying to hold the cherry blossoms off until April 4 so things will be nice for you. At the meeting (agenda below) we will be discussing two reports, one which I am attaching here and I will send you a second email shortly with the second. I am separating them so they don't crash your computers.

The chairs of the Mobile Source Technical Subcommittee , MerryLin Zaw Mon and Mike Walsh requested I forward the first report on Reducing Diesel Emissions from the legacy fleet for full CAAAC consideration to be forwarded to EPA. This will be the main topic of discussion for the morning session of the full committee. A following email will contain the draft recommendations from the Title V workgroup of the Permits, New Source Review and Toxics subcommittee which is the key topic for the afternoon session of the meeting on April 6.. I have included below more information of the Clean Air Excellence Awards Ceremony and other fine events that will be taking place during your visit to DC.

Final WG report to CAAAC 3-24-06.pdf draftapril2006Agenda.doc

The ceremony will take place at the Sheraton Crystal City Hotel on April 5th. The ceremony begins promptly at 5:00 pm, with light refreshments beginning at 4:30 pm. During this time we will also have tables set up outside of the ceremony space for you to view elements of the winning project or program. After the awards ceremony, we have been asked to extend an invitation to an off site reception hosted by Pat Raher. This reception is being held in honor of the Clean Air Excellence Award recipients and\ provides CAAAC members an opportunity to mingle and meet the award recipients. It promises to be an enjoyable evening with complimentary food and refreshments. The reception will be held at the following address:

Hogan and Hartson Columbia Square 555 13th St. NW Washington D.C. 20004-1109

The reception location is just approximately 10 minutes away by cab or car and 25 minutes from the ceremony site by metro. Directions to the reception are below.

Additional things to Do:

Washington D.C. and its surrounding areas are wonderful cities; we are providing you with some information about events going on in the

area during your stay. Luckily the annual Cherry Blossom Festival will be taking place during your stay. According to the website, "the 2006

festival marks the 94th celebration of the original gift of the 3,000 cherry trees from the city of Tokyo to the people of Washington, DC in

1912 (www.nationalcherryblossomfestival.org). Bike the Sites (www.bikethesites.com) has bicycle rentals available throughout your stay

and has coordinated with Trips for Kids Metro DC (www.tfkmetrodc.org) for a special Cherry Blossom Bicycle Tour on April 4, 2006 at 4:00 pm.

You can also check out a number of different websites for more ideas of tours, attractions, and sporting events.

www.washingtonian.com/dining/ Washingtonian Restaurants and Dining Information and Search Engine

www.si.edu Smithsonian Institution

www.nba.com/wizards/schedule/#Apr - Sports fans, Washington Wizards will be playing at home on April 4th and 8th.

www.washingtoncaps.com/schedule/ Sports fans, Washington Capitals will be playing at home on April 5th and 7th.

www.kennedy-center.org/ The Kennedy Center: check out the link to the Millennium Stage where you can see free performances every night at 6:00 pm.

www.washington.org Official Tourism Site of Washington D.C. www.culturaltourismdc.org/ A nonprofit coalition linking you to Washington's heritage and arts. www.dcvisit.com/ DC Visitor Information Center http://cityguide.aol.com/washington/ AOL City Guide: this site has a lot of family friendly ideas.

driving directions to reception:

A receptionist will be available at the East Tower elevator bank to escort guests to the reception in the Fulbright Center on the 13th Floor.

For guests arriving by cab, there is an entrance to the Columbia Square building on 13th St. (next to Warner Theater) and on F Street (next to Firehook Bakery).

For guests taking the Metro, the building is located directly above the Metro Center stop. When exiting the "Blue Line" train at Metro Center, please walk to upper platform and exit using the "12th and F Street" exit (in the direction of the Sales Office). Take the escalator to the street level and, as you come off the escalator, walk straight ahead (the Columbia Square building will be directly in front of you as you come off the escalator), the "F Street Entrance" to the Columbia Square building will be approximately 50 feet ahead of you. As you enter the Columbia Square building, take the staircase to your left (toward the East Tower of the building).

For guest driving to Hogan & Hartson for the reception, parking is available in the Columbia Square building on level P1. The entrance to the Columbia Square Parking Garage is on 12th Street (just before the blue awning for Port of Piraeus). As guests enter the parking garage and go down the ramp, they will see an entrance to P1 parking on their right, approximately two-thirds of the way down the ramp. Take the elevator from Level P1 up two levels to Level 1, and exit the elevator to the left (toward the East Tower of the building).

Dear CAAAC members,

The second of two important documents being sent to you to day for review and discussion at our April meeting

The attached file includes the final issue papers with recommendations from the Title V Task Force. We have also included introductory sections describing the process the Task Force went through and other materials. As you know, these are advance materials to prepare the subcommittee and committee members for the discussion about the Task Force that will take place at the April 5 and 6 CAAAC meetings.

Please know that due to size, we had to "zip" the file, and to get through the EPA servers, it was renamed with a ".xyz" extension. Anyone opening this file will need to rename it back to ".zip" before using a utility to unzip the file into its original Word format. I hope this is not overly burdensome.

Hello all,

Friday afternoon I emailed everyone materials for the upcoming CAAAC meeting. They were in 2 emails one both containing large files, the first message had the diesel legacy fleet report and the second message had the title v report. If you did not receive these files or can not open them please let me know. There has also been interest from many of you regarding an update on AQM phase 1 work at EPA. I intend to schedule this as one of the topics for our next meeting but in the meantime Carey Fltzmaurice has been nice enough to provide me with the attached information to forward to you to tide you over on where we are until we can properly update you. I look forward to seeing many of you in DC next week.

Great meeting everyone,

For those of you not in attendance we were able to vote forward 2 reports and have a wonderful awards ceremony and reception. A lot of productivity for a short meeting. Below are the presentation materials from the meeting, which will soon be on the website along with the notes and the minutes and the actual reports. I will get the diesel specific notes to all for review so they can look over their comments carefully since they will be submitted as an addendum to the Diesel report.

With regards to upcoming meetings. Based on member feedback it seems the preference is for a May, Sept December line up for meetings opposed to my originally proposed April, August, November, sooooo please pull out your little black books and see if you are available Sept 13 and 14 for a DC based meeting or if you would prefer to stick with the originally proposed August 2 and 3. I would like to also get feedback on December 6 and 7 as the following meeting meeting.

There was a request to try to coordinate the next meeting with the Air Innovations Conference in Colorado for the first week of September, but unfortunately due to the holiday and the timing of the conference this does not seem likely unless we straddle a weekend for the two meetings.

Once again great meeting and I will be in touch shortly.

Pat Childers

Great meeting everyone,

For those of you not in attendance we were able to vote forward 2 reports and have a wonderful awards ceremony and reception. A lot of productivity for a short meeting. Below are the presentation materials from the meeting, which will soon be on the website along with the notes and the minutes and the actual reports. I will get the diesel specific notes to all for review so they can look over their comments carefully since they will be submitted as an addendum to the Diesel report.

With regards to upcoming meetings. Based on member feedback it seems the preference is for a May, Sept December line up for meetings opposed to my originally proposed April, August, November, sooooo please pull

out your little black books and see if you are available Sept 13 and 14 for a DC based meeting or if you would prefer to stick with the originally proposed August 2 and 3. I would like to also get feedback on December 6 and 7 as the following meeting meeting.

There was a request to try to coordinate the next meeting with the Air Innovations Conference in Colorado for the first week of September, but unfortunately due to the holiday and the timing of the conference this does not seem likely unless we straddle a weekend for the two meetings.

Once again great meeting and I will be in touch shortly.

Pat Childers

Archive: This message is being viewed in an archive.

CAAAC members and interested parties,

While it was close in deciding the dates, for the next two CAAAC meetings there was a clear winner for the next meeting, **September 13 and 14** followed by a meeting on **December 6 and 7**. Both meetings are currently being scheduled to be in DC. The first meeting in 2007 will likely be the **first Wednesday and Thursday in May 2007**, which will also be the dates for the next Clean Air Excellence Awards.

I am looking for **suggested topics** for upcoming meetings. I am currently proposing that we consider utilizing **September's meeting** as an opportunity for EPA to respond to the many recommendations that CAAAC has forwarded in the past year which could include: AQM Phase 1 update, Title V report initial response, Radon Workgroup response from EPA and an initial response on the diesel repor t. Then in **December** I think we should have a detailed AQM Phase 2 report out and spend some time at the full committee level looking at our objectives for the 2007 meetings based on the upcoming focus of the subcommittees.

In addition to having one or two key topics on the agenda, I think we have done well over the past year having the Assistant Administrator do a report out on topical issues and more detailed subcommittee report outs over the last 3 or 4 meetings and propose we continue in this fashion.

As always your comments are welcomed and I look forward to continued success in our endeavors.

Pat Childers

Subject: Re: LRTAP HM Coordination Meeting
Dear Colleagues,
         As explained in previous email from Rhea
Jones, we are having a
teleconference on May 2, from 11:00-12:00, call-in
number (919)
541-4486, to discuss preparations for the LRTAP Heavy
```

Metals (HM) Task
Force (TF) Meeting on May 9-12. The primary purpose of the TF Meeting
is to discuss the review of Sufficiency and
Effectiveness of the
Protocol. However, other topics will include
emission limit values
(ELVs) for mercury from chlor-alkali plants and
medical waste
incinerators, and assessment of possible effects
based approach.

Attached are some of the draft chapters for the Sufficiency and Effectiveness Review. Also attached are proposals on ELVs by Germany, as lead country, for consideration. You are welcome to review the documents and provide comments. I plan to send you more materials soon. Please let me know if you have any comments or questions ASAP, but no later than 5/3/2006.

Thank You.

Chuck French

Subject

LRTAP HM

Coordination Meeting

Greetings,

The US EPA will be hosting a conference call to prepare for the UNECE LRTAP Heavy Metals Task Force meeting taking place May 9-12. This call will take place May 2, from 11:00-12:00, at call-in number (919) 541-4486. If you have any questions regarding this meeting, please contact Chuck French (919-541-7912) or me at this email address or at 919-541-2940.

Dear Mr. Bowman.

Thank You for the comments. As you probably know, a scientist from Sweden is the lead author for this chapter. Other scientists (including some experts from U.S. EPA and Canada) have been reviewing various drafts and providing comments/input over the past few months. We will consider your comments as we prepare our next round of comments and input to this draft chapter.

Best Regards.

Chuck French, Environmental Scientist, U.S. EPA Office of Air Quality Planning and Standards

Subject RE: LRTAP HM Coordination Meeting

Mr. French,

The draft chapters referenced in your e-mail were sent to our outside attorney who forwarded them to the American Dental Association. I have attached comments to the Products Chapter. We are quite concerned about the contents of that chapter, which are full of inaccuracies.

Dear Colleagues,

As explained in previous email from Rhea Jones, we are having a teleconference on May 2, from 11:00-12:00, call-in number (919) 541-4486, to discuss preparations for the LRTAP Heavy Metals (HM) Task Force (TF) Meeting on May 9-12. The primary purpose of the TF Meeting is to discuss the review of Sufficiency and Effectiveness of the Protocol. However, other topics will include emission limit values (ELVs) for mercury from chlor-alkali plants and medical waste incinerators, and assessment of possible effects based approach.

Attached are some of the draft chapters for the Sufficiency and Effectiveness Review. Also attached are proposals on ELVs by Germany, as lead country, for consideration. You are welcome to review the documents and provide comments. I plan to send you more materials soon. Please let me know if you have any comments or questions ASAP, but no later than 5/3/2006.

Thank You.

Chuck French

Subject LRTAP HM Coordination Meeting

Greetings,

The US EPA will be hosting a conference call to prepare for the UNECE LRTAP Heavy Metals Task Force meeting taking place May 9-12. This call will take place May 2, from 11:00-12:00, at call-in number (919) 541-4486. If you have any questions regarding this meeting, please contact Chuck French (919-541-7912) or me at this email address or at 919-541-2940.

Best Regards, Rhea Jones US EPA Office of Air Quality, Planning and Standards

CC

Subject Invitation

Mary - this is to confirm my invitation, on behalf of the Los Angeles Area Chamber of Commerce, to Bill Wehrum, to join us at our reception from 5:00 to 6:30 pm on Tuesday, May 16 at our Washington, DC offices at 555 11th Street. If Bill is interested, we would welcome his sharing a few remarks with us, but that is not a condition of his attendance. Others in the audience will include members of the Board of Directors of the Los Angeles Area Chamber of Commerce, who are in town for our annual DC visit.

As you indicated, our Energy and Environment Committee members will plan to meet with Bill separately earlier that day.

Thank you sincerely,

Bob

Hello CAAAC members and followers:

Hope all of you are having a happy productive summer. Sorry for the long delay between messages (did ya miss me?) but I wanted to have the next meeting planning in good shape prior to sending you out info. so here it is. Next meeting is on Sept 12,13, and 14, with the full committee meeting on the 14 and the subcommittees meeting on 12 and 13. These dates were agreeable to most but not all members, so for those who said they could not make these dates I apologize, you are a hard group to get together sometimes! The meeting will be in the DC area at the Crystal City Marriott at Reagan National Airport (contact info at bottom of email). Mark December 6 and 7 on your calendar for the following meeting and give me feedback if you are not available for those dates. Agenda wise for September, we are looking at the below draft agenda as the layout for the day, please let me know your thoughts on these proposed topics and timelines.

Awards - The request for Clean Air Excellence awards proposals will be in the federal register shortly so please start beating the bushes for applications from your constituencies. The deadline for proposals will be mid September. There have been some slight changes to the awards program this year, based upon suggestions from CAAAC members and EPA staff. Community Development/Redevelopment has been reshaped into a slightly broader community action category and we have added a holistic cross-category award to recognize efforts from entities that achieve excellence in more than one of the five award categories (sort of a zosal award for nonindividuals). The website should be updated with all the new information in the next two weeks.

A little house keeping - For any CAAAC members who have traveled under an EPA Travel Voucher, if you have not already requested your reimbursement for travel please do so as soon as possible so we can close out these files.

I look forward to seeing many of you soon so we can continue the outstanding work and discussions that have been occurring.

September 12 -AQM subcommittee

September 13 Innovations and Permits Subcommittee

September 14 Full committee

8:00 - 8:30 Registration

Hello Members and followers of the finest FACA in the world (at least that's what I would like to think)

Attached is a final draft of the agenda for the **September 12 -14** CAAAC and subcommittee meetings. I am hoping all can attend and have made reservations already. Please let me know if you can not make this upcoming meeting. The agenda is quite full with EPA responses to several of the CAAAC recommendations from the past year (Radon and Title V) and a great presentation from NARSTO. NARSTO is planning an assessment of what information atmospheric sciences will need to supply in order to support a multi-pollutant approach to managing air quality. Needs to support air quality management evolution towards a risk based and accountability oriented approaches will also be considered. **NARSTO would appreciate CAAAC feedback on the scope of this assessment and on the plans for implementing it.** This dovetails nicely with our own AQM work, as well as other efforts we may take on in the near future.

We are looking at the December (tentatively the 6 and 7th) meeting for EPA responses on the Legacy Fleet report and on the first AQM report and an update on the second report which is moving along and will almost be ready for primetime. Then on May 2007, we should have grand meeting with AQM phase 2 being the key topic and a discussion of what's next for CAAAC to address from each of the subcommittees.

Finally Submittals for the Clean Air Excellence Awards are due by Sept 13. CAAAC members have always been excellent on getting the word out on this prestigious award program. If you know of a great project please consider submitting an application for it, More information and applications are available at http://www.epa.gov/air/caaac/about.html

I look forward to seeing everyone shortly, let me know if you have any questions.

While we do not have a hotel locked in yet, it does appear that early January was the preferred dates for the Next CAAAC meeting. Most likely dates are January 10 for subcommittees and January 11 for full committees. The location will again be the DC area.

I understand that I missed a lively discussion on possible upcoming topics for future meetings. Rob provided me a list of what was mentioned and with so many good topics I will be drafting up agenda's for both the January and May meetings and will try to incorporate as many of the suggested topics as possible. A couple of the topics mentioned relating to diesel retrofit funding and biofuels are already being discussed next week at the mobile source technical review subcommittee meeting in Arlington (see link below, Full committee members are welcome to attend the subcommittee meetings).

http://www.epa.gov/air/caaac/mstrs/agenda200610.pdf

If you traveled on the tax payers dime please send your receipts in to Kamal Thadani here thadani.kamal@epa.gov so she can promptly file your travel vouchers.

Thanks to all let me know if you have any questions.

Optional: Kamal Thadani/DC/USEPA/US@EPA,

Description

While we do not have a hotel locked in yet, it does appear that early January was the preferred dates for the Next CAAAC meeting. Most likely dates are January 10 for subcommittees and January 11 for full committees. The location will again be the DC area.

I understand that I missed a lively discussion on possible upcoming topics for future meetings. Rob provided me a list of what was mentioned and with so many good topics I will be drafting up agenda's for both the January and May meetings and will try to incorporate as many of the suggested topics as possible. A couple of the topics mentioned relating to diesel retrofit funding and biofuels are already being discussed next week at the mobile source technical review subcommittee meeting in Arlington (see link below, Full committee members are welcome to attend the subcommittee meetings).

http://www.epa.gov/air/caaac/mstrs/agenda200610.pdf

If you traveled on the tax payers dime please send your receipts in to Kamal Thadani here thadani.kamal@epa.gov

so she can promptly file your travel vouchers.

Thanks to all let me know if you have any questions.

{In Archive} Climate Change Conference

David. Hayes to: Bill Wehrum

11/16/2006 02:32 PM

History: This message has been replied to.

Archive: This message is being viewed in an archive.

Bill:

I'm writing because the Environmental Law Institute and ALI-ABA are teaming up to put on their First Annual Climate Change Conference next March 22-23, here in Washington. As you know, ELI and ALI-ABA put on some of the environmental field's premier conferences, and they hope that the Climate Change Conference will become one of the "go to" conference in the subject area.

I am co-chairing the Conference along with Michael Gerrard of Arnold & Porter and Scott Schang of ELI. We are in the process of finalizing our speakers, and we would very much like you to participate on the faculty. More specifically, we hope that you could participate in a key segment of the Conference that will discuss federal climate change programs.

We were hoping that you might be willing to provide your perspective on this issue. We are also inviting Suedeen Kelly of FERC and Dave Garman of DOE to participate.

As is typically the case with this sort of thing, the conference organizers are looking to confirm speakers ASAP. So I'd appreciate it if you could get back to me on this shortly.

Thanks, and I hope that you can do this, Bill.

Dear CAAAC Members and followers

The January CAAAC meeting will take place at the Doubletree Hotel (Crystal City), located at 300 Army Navy Drive, Arlington, Virginia 22202. The subcommittees will meet on January 10 and the full committee will meet on January 11. The phone number is (703) 416-4100. We have reserved a block of rooms at the government rate of \$188 per night. When you call to make your reservations, ask for the rooms blocked for the "EPA Clean Air Act Advisory Committee" meeting.

I would like to use this meeting as an opportunity for EPA's response to the Committee on recent reports (AQM phase 1 and Diesel) and to start the subcommittees working on/identifying new tasks for 2007.

The next meeting is tentatively scheduled for May 9 and 10 and will provide an opportunity to wrap up on AQM Phase 2 recommendations and to start on the new work of the CAAAC (clean coal workgroup and possibly start a renewables/energy panel discussion) and of course have a wonderful awards ceremony.

Please feel free as always to provide me suggested topics to cover.

I will provide a draft agenda and more information in a future email

Thanks and have a great thanksgiving week!!!

Hi Bill, I hope this email finds you on your way to a relaxing holiday vacation. We wanted to keep you posted re: progress of the Advanced Coal Technology Work Group and also invite you to either provide opening remarks to kick off the first meeting and/or attend an informal reception that will follow the first day of the meeting, beginning at 5:00pm on January 8th. I checked your calendar and it looks like the timing for the reception may work for Jan. 8th. Please let me know if you would like to participate in one or both of these opportunities and I'll work with Shela to get it on your calendar. If you are able to do participate, we can also prepare some talking points for you if that would be useful.

In the meantime, below is the email and attachments (including draft agenda) recently sent out to the Work Group. I removed the PDF attachments to reduce the size of the email, but the documents can be accessed via the web site links provided. We expect 100% participation of the Work Group members at the first meeting, in addition to the attendance by a number of interested observers. We'll also loop back with you after the meeting to let you know how the meeting went and any noteworthy discussions that occurred. Please call or email if you have any questions. Happy Holidays! Anna (b) (6)

Subject

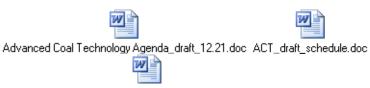

Holiday Greetings!

This email is to remind you of the upcoming meeting of the Advanced Coal Technology Work Group and to provide you with some background information prior to the meeting. The meeting dates are Monday, January 8th (from 1:00pm to 5:00pm) and a full day on Tuesday, January 9th (8:30am to 5:15pm). Please note that on January 8th, immediately following the afternoon session, there is an opportunity for Work Group members to continue discussions and meet one another at an informal reception. The meeting will take place at the Doubletree Hotel (Crystal City), located at 300 Army Navy Drive, Arlington, Virginia 22202. The phone number is (703) 416-4100. We have reserved a block of rooms at the government rate of \$188 per night. When you call to make your reservations, ask for the rooms blocked for the "EPA Clean Air Act Advisory Committee" meeting.

In preparation for the initial meeting, attached below are several background documents we hope you will find useful. These documents include: (1) draft agenda for the Work Group meeting; (2) draft proposed schedule for future Work Group meetings; (3) charge to the Advanced Coal Technology Work Group from the Clean Air Act Advisory Committee; (4) EPA's technical report entitled "Environmental Footprints and Costs of Coal-Based Integrated Gasification Combined Cycle and Pulverized Coal Technology"; (5) Intergovernmental Panel on Climate Change (IPCC) Report on Carbon Dioxide Capture and Storage: Summary for Policymakers and Technical Summary; and (6) National Energy Technology Laboratory's (NETL) presentation entitled "Tracking New Coal-Fired Power Plants" (9/29/06). We also included the website links for several of the documents in case it would be useful.

Please note that the agenda is in draft form and is subject to further adjustments. The presentations set forth in the agenda are intended to provide preliminary information and establish a common foundation of understanding for several topics that might be useful for the Work Group to consider to meet the charge from the Clean Air Act Advisory Committee. Additional information and topics to be addressed will be discussed and identified by Work Group members at the meeting. The proposed schedule for future Work Group meetings is also in draft form and subject to further discussion by the Work Group. Finally, we will have a list of Work Group members and contact information available for you on January 8th.

Ben Henneke and I look forward to working with you all. We very much appreciate your participation, expertise and time in connection with this important effort. Please do not hesitate to call me if you have any questions (202) 564-1664. We'll see you in 2007. Happy Holidays! Anna

This message is being viewed in an archive.

Dear CAAAC members and followers.

Our Spring meeting will be on May 9 and 10. May 9 will be the subcommittee meetings and the Clean Air Excellence Awards and a special Tribal Air Quality meeting of the full committee. May 10 will be the regular full committee meeting. The location of the meetings will be at the DoubleTree hotel again with the awards at the beautiful National Museum of the American Indian in Washington DC. In addition to our traditional awards program there will also be a tribute for Gregg Cooke at the beginning of the Awards Ceremony. I would appreciate the input of any members who wish to assist in organizing the tribute and awards ceremony. All help would be greatly appreciated.

Topics- The full committee meeting will start on May 9 approximately at 4:00 pm (exact time currently being finalized) at the National Museum of the American Indian on Tribal Air Quality issues. The Awards Ceremony and Tribute to Gregg Cooke will immediately follow this meeting after a short reception. I would like to suggest that we invite one or two of the excellent presenters from the Advanced Coal Technology Workgroup to present at the full committee meeting on May 10 as well. This will assist the CAAAC when we deliberate on the ACT workgroups recommendations come January 2008. We would also like to discuss, the future of the Awards program and new work for the CAAAC to undertake in 2008. At this time we are also requesting additional topics for the full committee meeting.

For your reading pleasure I have included a link to the newly announced mobile source air toxics rule that was just announced. I will have a draft agenda and more information to you shortly.

Climate Change

02/28/2007 08:29 AM

Bill:

I'm writing because the Environmental Law Institute and ALI-ABA are teaming up to put on their First Annual Climate Change Conference next March 22-23, here in Washington. As you know, ELI and ALI-ABA put on some of the environmental field's premier conferences, and they hope that the Climate Change Conference will become one of the "go to" conference in the subject area.

I am co-chairing the Conference along with Michael Gerrard of Arnold &
Porter and Scott Schang of ELI. We are in the process of finalizing our speakers, and we would very much like you to participate on the faculty.

More specifically, we hope that you could participate in a key segment of the Conference that will discuss federal climate change programs.

We were hoping that you might be willing to provide your perspective on this issue. We are also inviting Suedeen Kelly of FERC and Dave Garman of DOE to participate.

As is typically the case with this sort of thing, the conference organizers are looking to confirm speakers ASAP. So I'd appreciate it if you could get back to me on this shortly.

Thanks, and I hope that you can do this, Bill.

David J. Hayes

LATHAM & WATKINS LLP 555 Eleventh Street, NW Suite 1000 Washington, DC 20004-1304 Direct Dial: (202) 637-2204 Fax: (202) 637-2201

Archive:

This message is being viewed in an archive.

Here is the information that went out to the speakers from ALI-ABA. It should have gone to your office, but it's possible that it did not.

Obviously, the expectations for Bill in terms of written materials are modest, and the official deadline for submittal of those materials has passed, but if Bill has anything to offer, I'm sure that the conference organizers would be happy to include them.

Thanks.

TO: Planning Chairs and Faculty of the new ALI-ABA/ELI Course of Study, Global Warming: Climate Change and the Law, March 22-23, 2007, in Washington, D.C.

Thanks for agreeing to participate in this March's new ALI-ABA/ELI Course of Study, Global Warming: Climate Change and the Law!

A full program description and online registration are available on the web. at:

http://www.ali-aba.org/aliaba/cm106.htm

Please feel free to forward this Web address to your colleagues, clients, and any others who you think may be interested in attending the course. In addition, about a dozen copies of the printed course brochure will be sent to you. If you would like a larger supply of brochures to mail out or otherwise distribute, please let me know how many you'll need.

You will receive a letter soon from Tom Hennessey about course materials (due on February 8), hotel accommodations, etc. Please do NOT make your own hotel reservations at the Marriott at Metro Center. ALI-ABA has reserved a block of rooms there for traveling faculty, at a special rate; Tom's letter will explain how to request sleeping room accommodations at the hotel.

Once again, many thanks, and Happy New Year to all!

Archive:

Dear CAAAC Members and Followers,

As we approach the May 9 and 10, CAAAC meeting and annual Clean Air Excellence Awards Ceremony, I would like to update you on where we are in the process. A formal invite to the Awards Ceremony is below, please email it to anyone who you think would be interested/should attend the awards, we have seating for 300 people this year and I would love to fill the room as we honor 13 wonderful projects and pay a special tribute to Gregg Cooke. Please RSVP to Jennifer Brickett at JBrickett@icfi.com and myself and let us know if you will be attending the CAAAC meeting, the reception and the award ceremony by April 13, 2007. This will help us to get a head count and to prepare name badges and invitations for all attendees.

Outline for the Meeting

May 9, 2007:

8:30 - 2:00 Subcommittee meetings at Double Tree Hotel

All events below are at the National Museum of the American Indian (NMAI)

3:00 – 5:00 CAAAC Meeting Begins - Tribal Air Quality Forum

5:00 – 6:15 Welcome Reception for Special guests and CAAAC members

6:00 – 6:30 Winner photographs with EPA Leaders

6:30 – 8:15 Clean Air Excellence Awards

** Note there will be no entry into the museum from 5:30-6:00 p.m. due to NMAI policies.

May 10, 2007

Full Committee meeting resumes at Double Tree Hotel (see agenda below for details)

03/22/2007 09:14 AM

The official kickoff of the full CAAAC meeting will be at the Tribal Air Quality Forum from 3:00 to 5:00 pm on May 9 followed by the welcome reception from 5:00-6:15 p.m. The Tribute to Gregg Cooke and Clean Air Excellence Awards ceremony will follow the reception. These events are at the Smithsonian National Museum of the American Indian (4th St. and Independence Avenue SW, Washington, D.C 20024). There is no physical address, but it is not hard to miss the beautiful building and you can always visit the web-site at www.nmai.si.edu for more information. Business/Formal attire is appropriate. There will be many special attendees including: Clean Air Excellence Award recipients, friends and family of Gregg Cooke, Our partners in Air Quality Management from the Gila River, St. Regis Mohawk and Cherokee Nations, and of course you the members of the Clean Air Act Advisory Committee and EPA. This meeting and awards ceremony provides an unique learning experience and opportunity to pay honor to many wonderful wonderful people who make a difference in the nations air quality and health. I hope that everyone takes advantage of this opportunity and fully participates in the events on May 9 and 10. As always, please feel free to contact me if you have any questions. I look forward to seeing you.

<u>Hotel Information:</u> There are special government room rates reserved for the CAAAC at the *Double Tree Hotel in Crystal City* on 300 Army Navy Drive, Arlington, Virginia, United States 22202-2891 (Tel: +1-703-416-4100 Fax: +1-703-416-4126) just minutes away from the Ronald Reagan National Airport and the National Museum of the American Indian where the event is located.

** Below is the award invitation. Please view and RSVP by **April 13, 2007**. The Draft Tribal Air Quality Forum Agenda and the Draft agenda for the full committee

Dear CAAAC members

The May Clean Air Act Advisory Committee meeting and Clean Air Excellence Awards are approaching quickly. I hope everyone has hotel reservations and flight plans made because this should be an excellent two days (three if you attend the Advanced Coal Technology Meeting) of learning. The agenda for the meeting can be located at http://www.epa.gov/air/caaac

Running through the schedule quickly, The Air Quality Management subcommittee will meet at 9:30 on May 9th and the Permits, NSR and Toxics subcommittees will meet at 12:30 on May 9, 2007, both at the Double Tree Hotel.

Although there will not be a meeting of the Subcommittee on Economic Incentives and Regulatory Innovation (Subcommittee), you are invited to observe the meeting of the **Advanced Coal Technology Work Group on May 8th.** The meeting will be from 8:30am to 5:00pm at the Double Tree Hotel (Crystal City). The Work Group was convened under the auspices of the Subcommittee and the CAAAC to discuss and identify the potential barriers and opportunities to create incentives under the Clean Air Act to the development and deployment of advanced coal technology. The Work Group duration is for up to one year, with an interim report due at six months and a final report due at one year. The Work Group plans to submit its six-month interim report to the Subcommittee in June 2007. For additional information on the Work Group and the meetings held thus far, please go to http://epa.gov/air/caaac/coaltech.html.

The Full Clean Air Act Advisory Committee meeting will commence at 3:00 pm on May 9, 2007 with the Tribal Air Quality Forum and will take place at the beautiful National Museum of the American India n (directions to the museum are below) and will be followed by a welcome Reception and the Clean Air Excellence Awards at the museum. The meeting will then continue on May 10, 2007 at the Double Tree Hotel.

All agendas are available at the above web link.

We recently have had a great string of recommendations starting with the AQM and soon to be recommendations on Advanced Coal Technology, but I would like the members to think ahead and prepare for a discussion on May 10, about future potential efforts the CAAAC should undertake in 2007 and 2008.

I hope everyone can make all the exciting events we have planned, especially the Tribal Air Quality Forum and Awards Ceremony on May 9, 2007. With membership changes pending this may be one of the last times for all of us to get together formally and informally as a group, so lets take this opportunity to celebrate the good air quality work of the Award winners, our tribal partners and of the CAAAC itself.

As always please call me or email me if you have any questions.

Clean Air Act Advisory Committee Members,

On behalf of the Air Quality Management Subcommittee, we are pleased to send our draft report to the CAAAC. At next week's meeting, we will give a brief overview of the recommendations we presented to you at the January meeting and listen to your feedback. We will also be happy to receive your comments regarding the report after the meeting. We would like to thank all of the CAAAC members and other participants of our Subcommittee for all of the time and effort invested in this report.

Dear CAAAC members and followers.

Next Meeting

Archive:

Septembers meeting choices were tough with the votes split between the three dates, but a slight majority of the membership and relevant EPA personnel (you know who you are!) were asked the dates of the next CAAAC meeting are 90% locked into September 18 - 20 in the DC area (hotel pending). The plans are to have the ACT meeting on the 18th, subcommittee on the 19 (including the mobile source technical subcommittee) and full committee on September 20.

AQM Comments Due

Comments and letters regarding the May 2, 2007 draft of the Air Quality Management Subcommittee Phase II report must be received by EPA by June 8. Please send your comments to:

Debbie Stackhouse Air Quality Management Subcommittee U.S. Environmental Protection Agency Mailcode: C 404-05 Research Triangle Park, NC 27711

You may send comments by email to whitlow.jeff@epa.gov

Membership

CAAAC membership is expiring for all current members and we expect to have some changes in September. I would like to have Septembers meeting with all current members and new members so those being thanked for their service can give words of wisdom to the newcomers. Renewal and thank you letters as well as invitations for new members will likely be sent in August. If you are no longer interested in serving on the CAAAC or if you are in a different profession than listed on the CAAAC website, please let me know.

Notes from May

Many of you have requested the minutes from the last meeting so without further waiting here they are in their raw format. I will review prior to placing on the CAAAC website. If you have comments of your own please let me know.

Dear CAAAC members, EPA Participants, and interested 3rd Parties

Please find attached the draft agenda for Septembers meeting. It is chock full of good topics. At our last meeting we had a lot of discussion on communities, climate and energy but no decision on which topic to proceed so I thought I would give the membership a taste of each of the topics and then we can figure out what to put on our table for 2008 (I beginning to sound like Carey with the food cliches). Also for the first time in years the Mobile Source Technical Review Subcommittee will be meeting with the full committee. Please let me know if you have any suggestions or comments on how to improve the agenda.

While I have you on the line - I would also like to find out what dates are you likely available for the January 2008 meeting. **My thinking is either January 16 and 17 or 23 and 24 please let me know your preferences.**

Also - The Clean Air Awards Federal Register Notice was published and we are now taking applications for the 8th annual awards. CAAAC members and EPA staff have traditionally been the best way of getting word out about this wonderful awards program so please do your best to encourage people to apply. The link for the application is at http://www.epa.gov/air/caaac/clean_award.html.

In my last email (attached below) I mentioned membership changes. It is now likely that we will not have any changes to the membership until after the September meeting, so I look forward to seeing you all at the meeting no excuses.

Hello CAAAC members,

Please find an updated version of the CAAAC agenda for the September 19 and 20th meeting in Virginia. I moved things around a bit on the Sept 20 to better fit the presenters schedules. In addition to the meeting on these days, there will be a telephone conference call on September 24, 2007 from 1:00 pm to 3:00 pm (EDT) approximately to discuss the Flexible Permitting proposal (attached) recently signed by Administrator Johnson. The phone number for this conference call will be 866-299-3188 code 9195414979. I look forward to seeing you all soon.

Hello everyone,

Just a quick last minute reminder that the CAAAC will be meeting on September 20 with subcommittee meetings on the 19 and workgroup meetings on the 18. The agenda for the full committee can be located on the web at http://www.epa.gov/air/caaac/

For the first time in a long time, the Mobile Source Technical Review Subcommittee will be joining us, CAAAC full committee members should feel welcome to attend their subcommittee meeting, the agenda can be found at http://www.epa.gov/air/caaac/mobile_sources.html. Click on the link for the "Announcement of the September 19, 2007 MSTRS Meeting". Then Click on the link to view the agenda.

Attached also is the draft agenda for the Economic Incentives and Regulatory Innovations Subcommittees as well.

I look forward to seeing everyone soon. Please let me know if you have any questions

Dear CAAAC members and followers

Please save the date for the next CAAAC meeting which will be January 29,30, 31, 2008 at the Crowne Plaza Hotel in Crystal City. Workgroup meetings will be on the 29, subcommittees on the 30 and full committee on the 31.

Meeting Topics -

Please submit your suggestions for topics I currently have - AQM Phase 2 EPA response to recommendations and Advanced Coal Technology draft recommendations to be forwarded to EPA as the two key topics. I would also like to forward our brainstorming on a climate topic for CAAAC. Having spoken to many of you, a key interest appears to be addressing Climate Change and the Clean Air Act Amendments of 1990, how does it fit in, what is the relationship between climate strategies and criteria pollutant strategies, especially in the realms of energy. Thoughts on refining a climate topic to an area which the CAAAC can give recommendations on would be appreciated.

Membership

Many of you have questioned me about membership issues and your future on the CAAAC. I have made recommendations on membership based on tenure, attendance and constituency representation, these recommendations were much harder this time around since I have become so fond and familiar with all of you and your dedication to the cause of Clean Air. Currently, these recommendations are being reviewed by EPA's OGC and White House liaison.

I will be contacting some of you informally to thank you for your service on the committee soon so as to not tie up your calendar. A formal letter should be sent pre-holiday reiterating EPA's appreciation to those we are thanking and asking other members to continue on the committee. I appreciative your patience as we proceed.

I hope all have a happy thanksgiving and look forward to celebrating the new year and a new outlook for CAAAC in 2008. Let me know if you have any questions.

Pat Childers U.S. EPA (202) 564-1082 11/09/2007 09:11 AM

Dear CAAAC members

Happy Holidays,

Please find the hotel information and draft agend below for the January 29 -31 CAAAAC meeting which will be held at Crown Plaza Crystal City hotel in Arlington Virginia. Please make your reservations before new years if possible. As you can see from the draft agenda below the days will be very full. Please let me know if you have any comments pertaining to the agenda. I am inviting all existing members of CAAAC to attend this meeting to participate in the vote on moving forward the advance coal technology recomendations. After January the Deputy Administrator will be sending formal thank you's to many of the existing members who have served the CAAAC so well as well as invitation to new members and other existing members to continue the important work CAAAC has been performing. We will also be inviting new members to attend the meeting in January. If you have questions about your membership please contact me at 202 564-1082 and I will be glad to discuss this with you in more detail.

I look forward to seeing you all soon and hope you have a wonderful holiday season.

Crowne Plaza Crystal City 1480 Crystal Drive Arlington, VA 22202

CAAAC Members, EPA staff and true believers

Happy New Years,

To ring in the new years right I have added a lunch time field trip to our January meeting. Thanks to our friends at Hearth Patio and Barbeque Association, for the invitation below providing an opportunity to see hands on some of the wonderful things that our members are working on to clean the air. I have amended the CAAAC agenda to allow time for the event and HPBA will provide transportation and lunch if you RSVP. I look forward to seeing all soon. Lets all breathe easy in 2008.

RE: Invitation for January 31 Wood Stove Demonstration

Please be reminded of our invitation to you to see our wood, pellet and gas stove demonstration on January 31 during your CAAAC meeting (attached). HPBA is happy to provide lunch and transportation to you.

In our effort to have enough lunches and adequate transportation, please RSVP to me to let me know you'll be joining us. If you have already responded to me or to Pat Childers, it is not necessary for you to respond again.

We're very excited to show you the latest clean-burning technology the hearth industry has to offer. We hope to see you there.

Best regards,

Leslie Wheeler

Dear CAAAC members.

I figured that you would enjoy some reading material over the weekend prior to flying out to DC for our meeting. Attached below is draft agendas for the full committee meeting on January 31, and the two subcommittee meetings on January 30 as well. I am also attaching some read ahead material for a new workgroup on EPA Performance Measures. The workgroup will be meeting on January 29 and will be reporting to you on this issue during the subcommittee report out session, reading the attached strategy will give you some insight on what to expect. 31 members signed up for the lunch time field trip so we will need to wrap up our vote on the very important issue of Advanced Coal Technology so we can board the buses to the demonstration.

As always I look forward to seeing you there and discussing these important issues.

Subject CAAAC meeting date/draft agenda for January 29 -31 meeting

Dear CAAAC members

Happy Holidays,

Please find the hotel information and draft agend below for the January 29 -31 CAAAAC meeting which will be held at Crown Plaza Crystal City hotel in Arlington Virginia. Please make your reservations before new years if possible. As you can see from the draft agenda below the days will be very full. Please let me know if you have any comments pertaining to the agenda. I am inviting all existing members of CAAAC to attend this meeting to participate in the vote on moving forward the advance coal technology recomendations. After January the Deputy Administrator will be sending formal thank you's to many of the existing members who have served the CAAAC so well as well as invitation to new members and other existing members to continue the important work CAAAC has been performing. We will also be inviting new members to attend the meeting in January. If you have questions about your membership please contact me at 202 564-1082 and I will be glad to discuss this with you in more detail.

I look forward to seeing you all soon and hope you have a wonderful holiday season.

Crowne Plaza Crystal City 1480 Crystal Drive Arlington, VA 22202

Phone: 703 416 1600

The cut off date for reservations is December 29, 2007[attachment "Agendajano8.doc" deleted by Pat Childers/DC/USEPA/US]

Dear CAAAC members,

I look forward to seeing you next week. We should have an excellent meeting and award ceremony. The agenda for May 28 and 29 is located on our web page. http://www.epa.gov/air/caaac/ as is the invitation to the awards ceremony on May 28th.

There will be a reception prior to the awards, generously sponsored by several of the CAAAC members who will remain nameless (Jeff Muffat, Bob Wyman, Matthew Watkins, Stephen Hartsfield and Carolyn Green) which will give us all an opportunity to get to know each other and the award winners better.

On May 29 we will be down to business with lots of great energy. One item in particular I want everyone to pay attention to is the vision and goal effort that EPA is proposing the CAAAC undertake. I have attached a one (ok 2) pager for you to look at to start the discussion. The vision and goal document referred to in the is on our website at http://www.epa.gov/air/caaac/pdfs/2008_01_vision.pdf

I am also attaching the agenda for the economic incentives work group (all caaac members are invited and encouraged to attend) and will forward the New Source Review separately.

Please let me know if you have any questions and I look forward to seeing you all soon.

Dear William:

Have you heard of LathamConnect, Latham & Watkins' online social networking platform?

Register Today

We noticed you have not yet registered. To join, visit www.lathamconnect.com and complete a short registration process using the following information. Registration is quick and easy and usually takes only minutes to complete. Click here and enter your registration information exactly as listed below:

- First Name: William
- Last Name at Latham: Wehrum
- Attorney Number or Authorization Code:

Forgot your attorney number or need an authorization code? Send an e-mail to alumni.program@lw.com.

Once registered, you will be part of a unique and privileged group consisting of thousands of current and former Latham & Watkins' Attorneys. You will be able to view interesting Attorney and Alumni Spotlights, search for other members of the firm and read all the latest information Latham & Watkins has to offer.

Web site Features

LathamConnect members have access to a wide variety of resources, including:

- Real-time firm and alumni news
- Social networking directory of thousands of current and former Latham & Watkins' attorneys
- · Professional resources and thought leadership
- Information about alumni and attorney events

Thanks, and we look forward to connecting with you!

Best Regards, LathamConnect
